EDUCATION

FLUTTER DEVELOPMENT

BROTOTYPE

September 2022 - Present

HIGHER SECONDARY

St Mary's Higher
Secondary School

TECHNICAL SKILLS

LANGUAGES

- Dart
- Java
- C
- C++
- HTML

FRONTEND

- Flutter
- UI/UX
- CSS
- State Management
- REST API
- Animations

DATABASE

- Hive
- FireBase
- SQLite

FAMILIAR WITH

- Git
- Github
- Figma
- Cloudinary
- Postman
- Data Structure
- Firebase Crashlatics
- Firebase Dynamiclinks
- Firebase Push Notification
- Package Creating

OTHER MINI PROJECTS

- Student Details
- Password Generator
- Firebase Crashlatics
- Medical Clinic

FLUTTER DEVELOPER

Passionate self-taught Flutter developer with expertise in Dart and Flutter framework. Successfully completed two Android projects. Proficient in FireBase and JSON handling. Highly collaborative, delivering high-quality code independently.

PROJECTS

MUSIC APPLICATION | Tunner

Music application fetches songs from the device's internal storage using on audio query package. It offers all the basic features including now playing screen with Play/Pause, Next/Previous, background music playback, and the ability to fetch music lyrics using a REST API.

FEATURES

- Developed using Flutter, Dart and HiveDB under the MVC.
- Built majority of the functionalities of an offline music player such as Playlist, Favorites, Lyrics with API, Miniplayer etc.
- State management done with Provider.
- Implemented HiveDB for CRUD operations.

HOSPITAL MANAGEMENT | ConsultEase

ConsultEase is a cutting-edge mobile app that utilizes Flutter for the front end and Firebase as the backend technology. With seamless user, doctor, and admin interactions, the app facilitates doctor bookings, secure payments, and real-time consultations via chat. Admins can easily manage doctors, while users can book appointments based on availability, ensuring a convenient and efficient healthcare experience for all.

FEATURES

- Developed using Flutter, Dart and FireBase.
- Handles State Management with Provider under MVC pattern.
- Integrated payment service with Razor pay.
- Built-in chat functionality for smooth communication
- Map-based functionality integration.
- Used many packages and plugins from pub.dev.
- Signup using Email and OTP.
